

Civil Engineering students learnt various technologies in a National Level Championship and Workshop on “Total Station”

Date: 12th-13th April, 2017

Civil Engineering Department of Career Point University successfully organized a two days workshop on “Total Station” in collaboration with Entrepreneurship Development Cell, IIT, Delhi and Wigfotech Pvt. Ltd. The trainer, Mr. Abhay Kumar Verma from Uttarakhand, very interestingly exaggerated the tips and tricks to perform various required functions and calculations for civil engineering purposes.

In the two days workshop along with theoretical learning, Mr. Verma demonstrated practically the in-field process of setting of instruments, reading, plotting and measurement of angles and distances with the total station, setting the target offset, check tie and many other useful phenomenon. By means of total station instrument, he exhibited the remote height calculation, construction stakeout, area and volume calculation and data management. Mr. Verma took the participants into field area for providing a convenient practical knowledge of civil studies and execution.

Admission Office:

CP Tower, Road No. 1, IPIA, Kota (Raj.) India – 324005

University Address:

National Highway 12, Alaniya, Kota (Rajasthan) 325003
