## Career Point University, Kota

### **Guidelines for Student-Led Societies for Sustainability Engagement**

The University play an important role in promoting environmental responsibility and sustainable practices within the academic community. Student-led societies provide a valuable platform through which students can translate sustainability awareness into meaningful campus initiatives and community engagement. These guidelines encourage student organizations and societies to contribute to the institution's sustainability efforts by integrating environmentally responsible practices into their activities wherever possible.

#### **Student-Led Societies**

The Institution encourages all recognized student **societies, clubs, and student organizations** to consider sustainability as part of their engagement with campus life. Through student initiatives, **discussions, projects, and collaborative activities, sustainability awareness** can become an integral part of the learning environment. Such initiatives contribute not only to environmental responsibility but also to the development of socially conscious and responsible citizens.

Student societies may undertake activities that *promote awareness* of environmental issues and encourage responsible use of resources within the campus community. Educational discussions, interactive events, and awareness campaigns can help build understanding of sustainability challenges and encourage environmentally conscious behaviour among students. Engagement in initiatives that support **green campus practices, conservation efforts, and responsible event management** can further strengthen sustainability culture within the institution.

The Institution supports student participation in sustainability-related initiatives that contribute to environmental awareness, responsible campus practices, and community engagement. Student societies may collaborate informally with academic departments or institutional initiatives when organizing activities that promote sustainability values. Such engagement helps integrate sustainability awareness with academic learning and community outreach.

Student-led initiatives also provide opportunities for leadership development, collaborative learning, and practical problem solving. By engaging in sustainability activities, students develop a deeper understanding of environmental responsibility while contributing to a positive campus environment and broader societal awareness.

These guidelines are intended to encourage a culture of sustainability within the student community while allowing flexibility for societies to design activities suited to their interests and capacities. The Institution values the contributions of student organizations in strengthening environmental awareness and supporting the broader goal of responsible and sustainable campus engagement.
